HOW TO PLAY

CSBweb, Dungeon Master in a browser. Moves: CSBWin keys. Labels: QWERTY.

MOVE

J / KP 7	K / KP 8	L / KP 9
Turn left	Forward	Turn right
M / KP 4	, / KP 5	. / KP 6
Step left	Back	Step right

Or click the six arrows at the bottom right of the screen.

FIGHT

A column per champion, left to right as their names are at the top. A key opens that champion's attack menu; with it open, each key of their column performs its row's attack.

	1	2	3	4
Attack 1	Q	W	E	R
Attack 2	A	S	D	F
Attack 3	Z	X	C	V

So these letters fight, and never walk.

CAST

F1 F2 F3 F4	Who casts
BACKQUOTE	Take a rune back
SPACE	Cast

RUNES

A spell is a rune from each row, in order: the panel at the top right shows the next row's six after each one. The keys above each column pick that rune of the row shown.

	1	2	3	4	5	6
1. Power	LO	UM	ON	EE	PAL	MON
2. Element	YA	VI	OH	FUL	DES	ZO
3. Form	VEN	EW	KATH	IR	BRO	GOR
4. Alignment	KU	ROS	DAIN	NETA	RA	SAR

- Scrolls leave out the power: start with one, LO the weakest, MON the strongest and the costliest in mana.
- Then the scroll's runes, then cast: "Invoke FUL for a magic torch" is LO FUL, then cast.

PARTY AND GAME

7 8 9 0	Inventories
TAB	Pass, in an attack menu
F5	Quick save
F9	Quick load
PAUSE	Freeze the game

Esc, or a double click on the messages under the view, opens the settings, where every key can be changed.

FIRST STEPS

- The game begins in the Hall of Champions. Walk up to a mirror and click it to meet the champion inside.
- RESURRECT takes them as they are. REINCARNATE gives them a new name, wipes every skill they had and adds twelve points to their attributes.
- Take up to four. Click a champion's name at the top of the screen to open their inventory.
- Drop food or water on the mouth in the inventory to eat or drink, as the food and water bars there run low.
- Keep a lit torch in a hand: the dungeon is dark.
- At the top of an inventory, the disk icon saves and ZZZ rests the party; a click wakes it. Save often.

MOUSE AND TOUCH

- Every action is on the screen; a tap is a click. The arrows move, the hands above them fight, the runes above those cast.
- Click an object on the floor to take it: it becomes the pointer. Click the floor to drop it, the middle of the view to throw it.
- Click a wall's button or lever to use it, a keyhole with the key in hand.
